- 2-way, full range system
- 15" bass loudspeaker
- 1" compression driver
- Angled enclosure design for stage monitor use
- Built-in rigging points
- Stand mountable

DESCRIPTION

The ALTEA-415 and ALTEA-412 are passive systems designed for use with external amplification and an outboard DSP. They allow users to choose the powering option they prefer and benefit from the same enclosure features and top-of-the-line components as the ALTEA-400 powered versions.

The ALTEA-400 models use the renowned Mi Series loudspeakers. These professional-grade loudspeakers provide precise low frequency reproduction with excellent musicality. The high frequencies are handled by the M-32 compression driver with 1" exit to provide exceptional overall performance. A winning combination of matched components that offer ideal characteristics for music reproduction.
